Election/Restrictions

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-17 and 20-25 drawn to encoding a image in which a vector is created and vector is stored in vocabulary, classified in class 382, subclass 253.

II. Claim 18-19, drawn to pattern recognition in a digital image , classified in class 382, subclass 181.

3. Inventions I and II are distinct from each other because of the following reason:

Invention I and II are related as subcombination disclosed as usable together in single combination. The subcombinations are distinct from each other if they are shown to be separately usable. Invention I has separate utility such as compressing image and invention II has utility such as pattern recognition for product/specimen inspection.

4. Because these inventions are distinct for the reason given above and have acquired a separate status in the art as shown by their classification, restriction for examination purpose as indicated is proper.
